

# Stout ALUMNI NEWSLETTER

VOL. II, NO. 1

THE STOUT INSTITUTE, MENOMONIE, WIS.

NOVEMBER 1, 1953

## *Increase In Enrollment*

The Stout Institute announces an enrollment of 705 students at the end of the regular registration period at the college. The figure is an increase over the 669 students attending a year ago.

According to President Fryklund, the increased registration may indicate a rise in college enrollments for the next few years.

Figures released by Miss Gertrude M. O'Brien, college registrar, show 360 men and 345 women in attendance. This total is composed of 133 seniors, 101 juniors, 169 sophomores, 20 graduate students, 5 special students, and 277 freshmen. The latter figure is 26 per cent above the number of freshmen enrolled in 1952-53.

Additional students are also expected when registration is held in November for the second quarter of the college year. At that time, undergraduate men will be accepted for a full program of shop and drawing courses. Men and women will also enter the graduate program at that time.

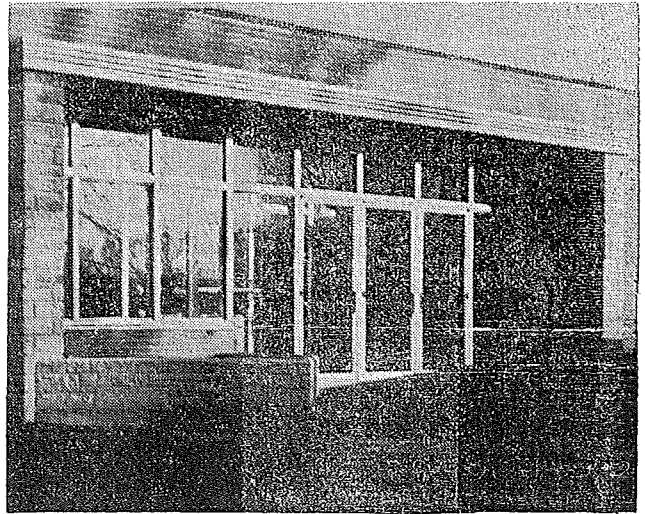

Of Stout's student body, 604 students are from Wisconsin. The remainder come from 15 other states and from Ecuador, Japan, Formosa, Guam, Hawaii, and the Philippines. It is believed that the \$200 out-of-state tuition now being required of non-resident students wishing to attend Stout has curtailed the number of out-of-state enrollees.

Veteran enrollment at the college totals 111, of whom 91 are receiving GI educational benefits. Of this group, 54 veterans are attending under Public Law 550, enacted during the Korean hostilities. Public Law 346 is still aiding 29 veterans. An additional 5 are enrolled under Public Law 16 and 3 more under Law 894.

## *Barnard Takes Rest*

On leave of absence at the University of Indiana until next September is David P. Barnard, assistant professor of industrial education at Stout and head of the audio-visual education center at the college. Mr. Barnard is working on his Doctorate of Philosophy in audio-visual education at Indiana.

In Mr. Barnard's absence, Lloyd Whydotski, head of the department of printing, has taken over the teaching of photography classes and also photography production work. Ray Cornwell, instructor in industrial education, is teaching the audio-visual classes and is production adviser for this year's Tower.

Highlighting Stout's 62nd year of educational endeavor is the prospect of occupying the new college library in November. This \$650,000 structure, housing 60,000 volumes, is of modern fire-proof construction in the most modern arrangement. The building will contain such long-desired facilities as a reserve reading room, a memorial room, seminar rooms, a textbook exhibit room, an audio-visual room, and a book repair center.

Plans are also underway for construction of a \$700,000 dormitory to house freshmen girls attending Stout. Part of the food service of the college will be located in the dormitory building. In other buildings on campus, extensive renovation and re-equipping are being carried on.

These improvements include new cadet teaching laboratories, a new clothing and textile center, and a revamped nursery school. Improved lighting is being installed in many shops and laboratories. New laboratory and classroom equipment has also been purchased.

Three new teachers have been appointed to the college faculty. Arnold G. Nelson, who is completing his doctorate at the University of Minnesota, will be assistant professor of English. He holds a Bachelor of Arts from Hamline University and a Master of Arts from the University of Minnesota. He has taught at Hamline, the University of Minnesota, and the University of Wisconsin's Freshman Center at New Richmond.

Nelson was former editor of a nationally-circulated non-denominational Sunday School paper and has been a free-lance contributor of magazine articles. He is completing his doctorate on

(Continued on page 2)

(Continued from page 1)

an advanced graduate fellowship of the American Council of Learned Societies.

Instructor in the clothing department of Stout's Division of Home Economics is Mary Clark, daughter of Mr. and Mrs. C. F. Clark of Menomonie. A graduate of Menomonie high school, she received both her Bachelor of Science and Master of Science from Stout. She has also taken work at Michigan State college.

Miss Clark taught in the schools of Niles, Michigan, Eau Claire, Barron, and Whitefish Bay. In addition to service with the American Red Cross, she engaged in commercial work in Minneapolis and Philadelphia. During the past year, Miss Clark has been studying clothing marketing with the Dayton Company of Minneapolis.

Assistant librarian at the college is Robert A. Elftmann. He holds a Bachelor of Arts from the University of California and Master's degrees in Science and in Arts (Library Science) from the University of Minnesota. Mr. Elftmann is now engaged in advanced work at Minnesota. He comes to Stout after being librarian at State Normal and Industrial College, Ellendale, N. D.

Mr. Elftman has also been principal of Odessa, Minnesota, high school and has held library positions at the University of California, the New York Public Library, and the biological-medical division of the University of Minnesota library. He is a past commander of the Odessa American Legion post and was Department Chairman of the Minnesota American Legion's Committee on Recreation.

### *Lamb at Wayne University*

Information received from Alfred C. Lamb, a degree graduate of 1924, indicates that he is Director of Buildings and Grounds at Wayne University, Detroit. He is supervising 8 million dollars in new building construction, plus directing 300 maintenance employees in present buildings.

The Lamb family has one son, Alfred, born in 1932, who reported for military service in January.

Of special interest among Mr. Lamb's duties is his participation in the Wayne University Television series, "March Through Time." This is a ten-week series of educational programs highlighting such events in man's progress as the development of boats, discovery of light, perfection of photography, and practical use of printing.

Alfred has also proved to be an active participant in educational circles. He has just completed a year as president of the 3000-member Detroit Schoolmen's club. He is a faculty advisor at Wayne University of Chega Fraternity (formerly Phi Sigma Epsilon).

Recently he attended a meeting of the International Association of Public School Business Officials at Atlantic City. He was a participant on the program on "Maintenance of School Buildings" at that meeting.

### *Homer Rose With Navy*

A graduate of The Stout Institute of 1931 is Homer C. Rose, who is assistant head and senior training specialist, standards and curriculum branch, training division, of the Bureau of Naval Personnel. The Training Division manages and supports navy schools and provides instructional materials which include texts, training aids, correspondence courses, and a variety of special equipment.

Mr. Rose recently undertook an annual trip to participate in the indoctrination course provided for officers assigned as administrators and instructors in the 52 Naval Reserve Officer Training Corps Universities. This conference is being held in Northwestern University and is an intensive course in teacher training and in administration.

Now a participating member of the Northeast Virginia Industrial Arts Association, Mr. Rose has had contact with Stout persons other than while an undergraduate. In 1942-43 he worked as a teacher-trainer and later as a director of certain in-service training groups in the Armored Force School at Fort Knox, of which President Verne C. Fryklund was Director of Teacher Training.

Mr. Rose is a life member of the National Stout Institute Alumni Association. He is a member of the U.S. Civil Service Committee of Expert Examiners and a member of the Board of Directors of the N. E. Virginia Industrial Education Association. He has published over 75 articles, including co-authorship of a set of three books written by instructor trainers for the Armored Command at Fort Knox.

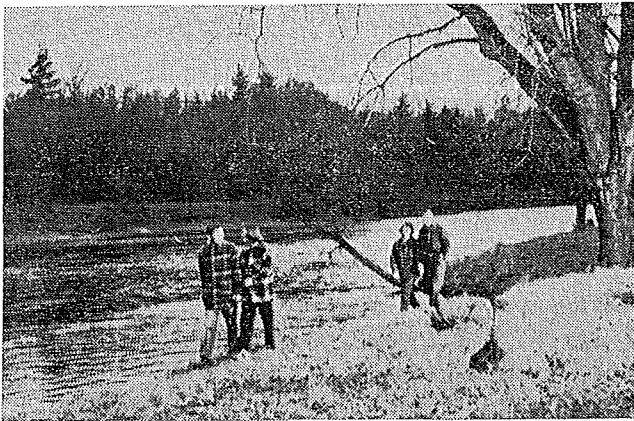

---

Ira C. Madden (1927 and his wife Emma G. (1929) are both Stout grads, now living in the Detroit area. They have a son Charles, 21 years old, who is a dental student at the University of Michigan, and Gloria, in the sixth grade. Charles will receive his dental degree in June, 1955. The Maddens will celebrate their silver wedding anniversary on August 1, 1953.

Mrs. Madden is teaching nutrition and commercial foods at the Goldberg Trade School for Girls. Mr. Madden teaches general shop at Crary School and supervises student teachers from Wayne University.

Ira received the "Master Teacher Award" from the Michigan Education Society in 1947. He was chosen in April, 1949, as "Teacher of the Month" by the Detroit Teachers Association.

At the present time, Mr. Madden is serving as a member of the advisory committee of the Industrial Arts Awards program sponsored by the Ford Motor Co. A national enterprise with which Mr. Madden will be associated until at least 1955, the project attracted over 5,000 entries last year.

How Well do you remember Menomonie??

Do you want to know more about the city where you combined your years of education and fun?

Well, if you do, come further along this conducted tour of Menomonie as it is today—Let's go!

The old Flame Cafe—a "home away from home" for many Stout undergraduates—is now Kelly's Furniture store. The Flame itself, now with more of a cocktail lounge atmosphere than in its old location, has been moved to the old Huber home, completely remodeled for the change. The well-known Huber's poolhall nearby is now the Pla-More Bowling Alley.

Other changes include the transformation of the piano factory across the Red Cedar into Parker's Quink ink factory, the only factory in the nation now making that ink. Menomonie also boasts a new motel on highway 12, near the outskirts of the city going toward St. Paul.

Such secluded hiking spots as Point Comfort and Paradise Valley are still in the vicinity, but seem to have lost much of their appeal for today's student body. Hofland's millpond dam, washed out years ago, has not been replaced and is no longer the scene of gay skating parties.

The old armory, scene of many a bitter battle with Eau Claire and between KFS and FOB is now little used for college or high school affairs. The City of Menomonie has constructed a beautiful modern 2200 seat gym which is the home floor for both Stout and the high school. The playing area at Nelson field has been moved east toward the hill and a fine lighting system installed for the night games which Stout plays entirely.

Main street has been resurfaced and widened for part of its length, and provides a big improvement. On Main Street is the rebuilt Orpheum theatre, now called the "Stout." The famous "Grand" bloody bucket of fond memory, has been made into stores. An entirely new movie palace, the "State" occupies the former vacant lot near the corner of Main and Broadway. A 400-car outdoor theatre will soon operate from May to October at the west heights above Wakanda Park.

So much for movies. The old grandstand at

the Fair Grounds was completely burned and only temporary bleachers are used for the junior fair. The popular old "Olympia" became the "College Inn," but that in turn has become an appliance store. The Candy Shop, operated by Chase and Wagner, is now a dime store.

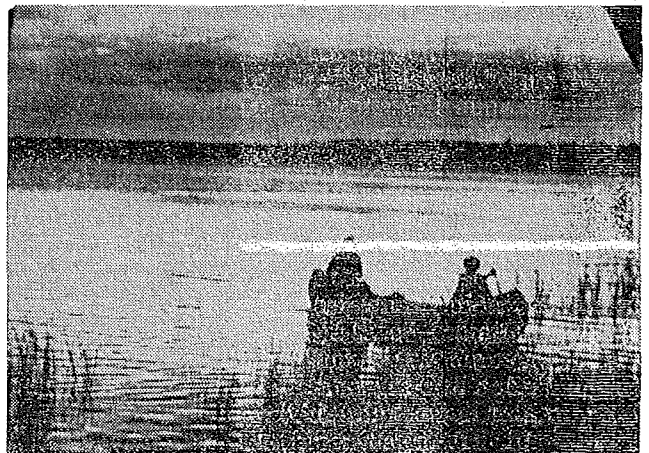

To replace these losses, a dairy bar stands on the corner of Main and Broadway. Jake Lee will soon give his soda fountain to the recreation center in the basement of the Tainter Memorial and thus another popular rendezvous is going.

The thrill of having giant trucks shake the girls dorms as the semis struggled up the hill from the narrow bridge near the dam is gone. A straight new bridge structure, high above the river, gives the trucks a smooth run into the city. A new bridge has also been built by Riverside Park, and adjoining Highway 29 moved further south by many feet.

The Menomonie boathouse still stands, but it lacks for canoe business, which is not as rushing as in the days of the Roaring Twenties. The Old Wilson "castle" is now Eichelberger Hall, girls dorm at Stout in line with Tainter Hall and Tainter Annex. Visitors traveling to our city can still use the "short line," which maintains its death defying 20 mile-per-hour schedule.

The Old Carter ice house and saw mill remain in their previous condition. Plans, however, are being contemplated to raise Lake Menomin 12½ feet. Although the rise may do certain things to Wakanda Park and the pumping station, it will make possible again the canoe trip up Wilson Creek. The lake has so filled in with weeds and silt in recent years that it provides too little electrical power and is of slight value for water sports or fishing.

Stout has a new union in the second floor of its physical education building. There pingpong, billiards, a soda fountain, television, radio, rebuilt bowling alleys, booths, and other attractions tend to keep students nearer the campus. The swimming pool has recently been all redone and attracts many swimmers.

## Borosage Appointed to USOE

Lawrence Borosage has recently been appointed as the new chief of the Trade and Industrial Branch of the Vocational Division of Education. Prior to this assignment, Mr. Borosage had been a lecturer and teacher-trainer at the University of Michigan.

After attending Stout from 1939 to 1942, Mr. Borosage received his B.S. and M. A. and is currently a candidate for a PH.D. degree from Ohio State University. He left Stout in 1942 to become a Training Supervisor in the Columbus Division of the Curtiss Wright Corporation.

At the end of the war he was appointed Assistant State Supervisor of Trade and Industrial Education for Ohio.

Mr. Borosage supervised the reorganization of the Veterans Approval Agency, served as a member of the Ohio High School Board, directed the educational activities of the Columbus Foreman's Club, and was active in the affairs of many educational associations and fraternities.

His work in Michigan was with trade and industrial and practical arts instructors, local school principals and administrators. During the month of February, he and his family moved to Washington, D. C.

## CLASS OF 1916

Mrs. R. T. Hart (nee Mable Anderson) is the operator of Hart's Old Lynce Coffee House at Moose Lake, Minnesota.

Mrs. W. E. Thurston (nee Mabel Plummer) formerly taught home economics at Detroit and also was a dietitian there. She now lives in Durand, Wisconsin.

Mrs. H. E. Erickson (nee Winifred Howard) is the Director of Dietetics at Ancker Hospital in St. Paul, Minnesota.

## CLASS OF 1915

Mrs. Bernice S. Thomas is house mother at Memorial Hall and teaches seventh and eighth grade home economics in the campus school at the college in Eau Claire, Wisconsin.

## CLASS OF 1914

George Carlson teaches at Marshall high school in Minneapolis, Minnesota.

## CLASS OF 1913

Mrs. S. M. Simpson is a homemaker in British Columbia, Canada. She formerly taught at the local hospital. She belongs to many organizations of their church.

## CLASS OF 1908

Newton Van Dalsum works for his son in his woodwork shop. He also is president of the Belamy Centennial Club No. 1 since it began in 1950.

## Help Judge Ford Awards Contest

Recent naming of 30 judges who selected winners in the nation-wide 1953 Industrial Arts Awards competition of the Ford Motor Co. indicates a high percentage of The Stout Institute graduates among the judges.

According to the announcement which named the judging teams, each of the 30 persons was "carefully selected on the basis of experience competency, and general reputation in the division he will judge." Representatives of both education and industry, from all geographic areas of the United States, are included on the teams.

The three-men teams were assigned to each division of the Industrial Arts Awards. Judges reported to Dearborn, Michigan, and remained three days to evaluate thousands of entries from the nation's schools. Director of Educational Services for the entire Ford industry is Dewey Barich, a Stout Institute graduate of 1933.

Other Stout Institute graduates among the judges include Philip W. Ruehl, assistant professor of industrial education at Stout; E. L. Barnhart, head of industrial arts at Kansas State college; Roy A. Radtke, supervisor of industrial arts for the Milwaukee public schools; E. D. Meyer, associate professor of industrial arts, Oregon State college; H. P. Gerber, chairman of industrial and fine arts at Northern State Teachers college; Claude E. Nihart, supervisor of vocational and practical arts for the Los Angeles schools; and George Bowers, engineering sales representative of the Carborundum Corp.

New members of the National Advisory committee for the Awards have also been announced. According to the statement which named committee members, "All are prominent in the field of industrial arts." Of the eight new members from throughout the United States three are graduates of The Stout Institute.

These graduates include E. L. Barnhart, E. D. Meyer, and Ira C. Madden, who recently won the "Teacher of the Month" citation of the Detroit Teachers association. He also holds the "Master Teacher" award of the Michigan Industrial Education association.

## News of Former Teachers

At any convention or gathering of Stout alumni, the conversation sooner or later turns to faculty members under whom the alumni took training. Then the questions fly, "Where is Dr. Stephan?" "What new job has Charles Frailey taken?"

In an effort to answer these implied questions, the editors of this bulletin have gathered information on the activities of a number of former Stout instructors. Dr. Stephen Stephan, to answer our own question, is now a professor in social science at the University of Arkansas. Charles Frailey, formerly in music at Stout, is now on the staff of the Wisconsin Education Association at Madison.

Harold Cooke, Stout's well-remembered faculty personality, now conducts the Rochester Symphony orchestra at Rochester, Minnesota. Dr. Boyd Shafer is executive secretary of the American Historical Society, Washington, D.C.

Dr. J. Murdock Dawley, also a social scientist at Stout in years gone by, is now chairman of the social science department at New York State Teachers College, Fredonia, New York. Dr. Frank Huntley, formerly in English, now is on the faculty of the University of Michigan.

Miss Marie Walters, formerly at Stout, is now a staff member at McMurray College, Jacksonville, Illinois. Dr. Stuart Anderson, who left Stout recently, is a vocational specialist in the Institute on Inter-American Affairs, Lima, Peru. Francis Robinson, formerly in psychology, is now a professor at Ohio State University.

Marion Boardman, Stout school nurse, is now Mrs. Lawrence Marx. Dr. Marx, the psychologist, is on the faculty of the University of Oregon. John Tabille, remembered in social science, now is on the staff of the Milwaukee School of Engineering.

Robert Welch, for a time in the sheet metal department at Stout, is now an associate professor at Florida State University. Robert Blaesing, recently resigned in printing, is working in a print shop in Ferndale, Michigan.

The famous Tony Storti, star player and coach at Stout, is now football coach at Montana State College, Bozeman, Montana. Howard Hoving, of the English department, now has a position with the Minneapolis Honeywell Corporation, in Darby, Pennsylvania.

Dr. Earl Burbridge, former Stout coach, now is a director of research for Upjohn Laboratories. Dr. Francis Drake, at one time in Speech, is now on the faculty of the University of Minnesota. Dr. Marceline Erickson, also of the speech department instructs at Mankato State Teachers College.

Letitia Walsh, former Stout home economist, is now in the home economics department of the University of Illinois. Doris Hale, who taught psychology at Stout, now is Mrs. H. R. Richmond of Delrosa, California. C. W. Sprague, once in the Stout printing department, is now at Fitchburg

State Teachers College, Fitchburg, Massachusetts.

S. E. Paulus, one-time coach at The Stout Institute, is with the School Assembly Service of Chicago, Illinois. Ralph Betterly, popular general sheet metal instructor, is now in the engineering school of Northwestern University.

---

Having served for 25 years as a general shop teacher at Hutchens Int. School in Detroit is the enviable record compiled by Ole Victor Olesen, a Stout graduate of the early 1930's.

He is proud of his two fine sons: Vic, 21 years of age, who is a junior at Wayne University and who recently was on tour for the General Motors Corp., and Jim, 15 years old, who studies piano and voice, and plays basketball, in Cooley high school.

Mr. Olesen works each summer as judge of models submitted to the Fisher Craftsman's Guild. He has run their convention for the winners for two years.

Olesen is also a director of the Detroit Schoolmen's Club, an organization of 3,000 members. He is president of the Metropolitan Detroit Alumni Association. This group recently sponsored a mid-winter dinner dance at the Birmingham Community Center.

Mr. Olesen reports that Captain Ernest Sandeen, a Stout graduate of 1938, is attached to the ROTC unit at Wayne University. Captain Sandeen formerly taught in Minneapolis.

---

Well-known to Stout alumni is William J. Micheels, a 1932 graduate, now professor of industrial education at the University of Minnesota. He and his wife Margaret—whom he describes as "a former Iowa girl"—have a son and daughter, both enrolled in the University of Minnesota.

Dr. Micheels reports that he recently served as a member of a survey team studying the army's Anti-aircraft and Guided Missiles School at Fort Bliss, Texas. This assignment, reports "Bud" is enough on his recent doings.

However, Dr. Micheels tells of the location of several Stout graduates in his area. William Baxter ('33 or '34) heads his own advertising agency in Minneapolis. Mr. Baxter's wife is the former Evelyn Hunt ('33 or '34).

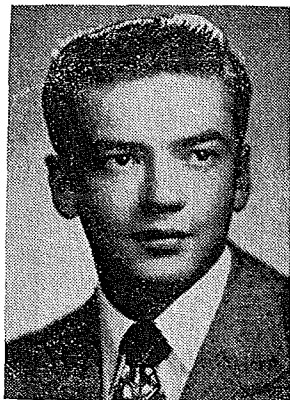

Lewis G. Palmer ('32) is assistant professor of drawing and descriptive geometry at the University of Minnesota. His wife, too, is a Stout grad.

---

S. K. Wick, a diploma graduate of 1921, reports that he is Minnesota State Supervisor of Industrial Education. He indicates that many Stout alumni are teaching in the State of Minnesota and pays the college the compliment that these graduates "have a quality which is consistently good."

Mr. and Mrs. Wick have three children and two grandchildren. Mr. Wick attended the A.V.A. meeting in Boston and was in attendance at the alumni breakfast reunion held at that time.

Announcement of establishment of the Fred Fischer Memorial Loan Fund, in honor of a Minneapolis man who graduated from The Stout Institute and died in the Armed Forces, has been made by Dr. Verne C. Fryklund, president of Stout.

The loan fund was established by the student governing board of the college with a fund of \$500 presented by Mr. and Mrs. Hugo Fischer in memory of their son. Ensign Fred Fischer graduated from The Stout Institute in June of 1952 and died in the U. S. Naval Hospital in Yokashuka, Japan, in November of that year.

While at Stout Ensign Fischer was a member of Epsilon Pi Tau honorary scholastic organization in industrial education, the Radio club, the Ski Club, and the Stout Symphonic Singers. He was president of the latter group in his senior year.

Loans from the fund will carry no interest and will be for a maximum four-year term. Applications for loans will be considered by a committee of three students and a faculty adviser. To be eligible, a student must have been in residence at Stout for at least one academic year and possess a one-point grade average.

Recipients of loans from this fund will receive a letter telling the history of the fund and outlining the provisions of the loan. Ensign Fischer's picture will appear at the top of the letter.

Upon recommendation of President Fryklund, the Board of Trustees of The Stout Institute recently accepted the gift and the plan of operation.

### *Receives Doctorate Degree*

A Stout Institute graduate, Blossom Victoria Johnson (B. S. '27) has received her Ed. D. from the University of Missouri at commencement exercises held in Columbia, Mo., in June.

Among the teaching positions which Miss Johnson has held are those in Rice Lake, Wis.; Vulcan and Norway, Mich.; and River Forest, Ill.

For her doctoral dissertation, Miss Johnson wrote on, "An Experiment in Adaptation to Pre-college Experiences in Clothing Classes."

### *Erickson Wins Citation*

Professor Erickson, known widely as "Triple E," is professor of industrial arts and assistant director of the University of California Extension Division. The citation was made at the Boston convention of the American Vocational Association.

Prof. Ericson was unable to attend the convention and Dr. Monroe of Santa Barbara College accepted the award on his behalf and presented it to him in Santa Barbara. In addition to a specially prepared scroll, an engraved wrist watch is included in the award.

The congenial professor, a senior faculty member at the college who joined the staff in 1925, is the 11th man in the nation to receive this citation. Only two other men on the West Coast have been so honored, Dr. Howard A. Campion, assistant superintendent of the Los Angeles City Schools, and Dr. Edward A. Lee, dean of the School of Education at the University of California, Los Angeles.

Prof. Ericson is the author of 150 professional articles concerning education and his specialization. He has written several books that have been of national importance in the field of industrial education. After graduating from Stout, he received his MA degree from the University of Southern California.

In presenting the award, Dr. Monroe stated that "Prof. Ericson is an outstanding example of the freedom and privileges of the democracy in which we live, having come to this country as an immigrant boy, he took full advantage of the free enterprise of education and opportunities to develop his career to the extent to which he has been honored by this citation."

The citation scroll reads as follows: EMANUEL E. ERICSON, California's adopted son, and native of Sweden, pioneer in industrial arts education, craftsman, author, editor, teacher of teachers and kind friend to all American youth: we of THE SHIP salute you.

From your first educational assignment in Oklahoma forty years ago, your unstinted devotion and constant service to industrial arts, to vocational education, and to education in general has been an inspiration.

Through your professional writings, through your teaching, and through your understanding personal counsel you have aided innumerable hundreds of teachers that they too might strive to serve education according to your ideal.

The graduate school of the University of Minnesota has announced that two Stout Institute alumni have recently achieved advanced degrees from the University.

Bernard O. Hughes, a bachelor of science graduate from Stout in 1948, received a master of arts degree from Minnesota. Eugene C. Miller, a bachelor of science at Stout in 1947, also received a master of arts from the University.

From Green Bay comes information of interest on Harry O. Eiken, Stout graduate of 1928. He and his wife Beth have recently become grandparents to "Mike," baby boy born to their son's family.

Proof of Mr. Eiken's stability is evidenced in the fact that he was elected director of the Green Bay School of Vocational and Adult Education in 1928 and has served in that capacity ever since.

He is a member of the American Legion, Veterans of Foreign Wars, area chairman of the Veterans Schoolmen Association, State Chairman of the Crippled Children's Commission, member of the Wisconsin Elks Association, chairman of the school and home section of the Fox River Valley and Lake Shore Safety Council.

As a life member of the American Vocational Association, Mr. Eiken recently attended the AVA convention in Boston. He is also an honorary member of the Green Bay Packers Alumni Association.

Mr. Eiken reports that, in his tenure as director of Vocational and Adult Education in Green Bay, the school has grown out of an old business building into three other structures: one 121 by 151 feet, three stories high; the second 65 by 130 feet, three stories; and the third, a 50 by 90 one-story annex.

### 100 % Placement Again

Employment opportunities for The Stout Institute alumni continue to be excellent. By last June, every home economics graduate had already been placed. With very few exceptions, Stout's home economics graduates accepted positions in Wisconsin. Salaries for first-year teachers without previous experience ranged from \$3,000 to \$4,000 for nine or ten-month positions.

Every industrial education graduate of the 1952-53 class has also been placed. Many have accepted teaching positions, while others have been attracted by the economic opportunities of industry. Salaries for this year's Stout industrial education graduates ranged as high as \$4,500 to \$4,800.

### Brophy At Cornell University

Father of nine fine youngsters—three girls and six boys—John M. Brophy (1939 graduate) indicates that he is associate professor at the New York School of Industrial and Labor Relations of Cornell University.

He recently handled an American Management Association "Management Seminar" at Chicago. Topic of the gathering was "Integrating First Line Supervisors with Management." John also addressed the American Hospital Association in Chicago on "Job Analysis, A Basic Administrative Tool." He will repeat the talk in Washington in March.

He plans to talk to the Industrial Nurses Association and the American Society of Safety Engineers on "Communications in Industry." Mr. Brophy is also planning a seminar of profit-sharing for May.

In the summer, John will journey to Florida to teach summer school at Florida State University and later return to Cornell. He teaches Personnel Administration, Wage and Salary Administration, Training Within Industry, and graduate seminars in personnel administration as possible courses during any particular school year. He may undertake a sabbatical leave in 1953-54.

The industrial education staff at Cornell is made up of Mr. Brophy, L. Al. Emerson, and C. K. Beach. The school of Industrial and Labor Relations is the only one of its kind in the nation with a full graduate and undergraduate program leading to a degree in industrial relations, a field of many opportunities for graduate work and placement.

Mr. Brophy reports that the graduate school is on the lookout for persons desiring advanced degrees as a basis for administrative or supervisory responsibility in industrial education. For candidates showing evidence of superior scholastic ability and one year of teaching experience, the possibilities are good for scholarships or assistantships.

In addition to a growing family ranging in age from one month to 13 years, the Brophys are active in church work and scouting. Mr. Brophy was recently re-elected for the fifth consecutive year as secretary-treasurer of the Industrial Training Council of New York State. He is also a district representative on chapter promotion and research committeeman for the American Society of Training Directors.

Florence I. Scouler, a Stout graduate of 1919, indicates that she is Dean of the School of Home Economics at Texas State College, Denton, Texas. She formerly was head of the department at that institution.

Miss Scouler reports that she attended the American Dietetic Association convention in Minneapolis.

On campus this Fall are the proud recipients of the Stout Alumni scholarship awards for the school year 1953-54. They are Janice Claire Jenquin of Seymour, Wisconsin and Kenneth W. Reynolds of Alpena, Michigan.

These students competed against twelve other applicants. The competition was keen. The winners were chosen on the basis of the following qualifications: (1) high scholastic average; (2) interest in home economics or industrial arts; (3) excellent character traits; (4) participation in school, community, and home activities; and (5) a need for financial assistance. Miss Jenquin is majoring in institutional management, and Mr. Reynolds is majoring in industrial education.

Speaking on behalf of all Stout alumni, the scholarship committee wishes these two winners a very happy and successful future. May they continue to progress at the school of their choosing.

### *Alumnus Wins Scholarship*

Phyllis Allman, a Stout Institute coed from Phillips, Wisconsin, has been named the 1953 scholarship winner for the Wisconsin Dietetic association. Announcement of the award was made this week by Dr. Alice J. Kirk, dean of The Stout Institute division of home economics.

Purpose of the scholarship, which is offered annually by the Dietetic association, is to encourage women to take advanced training in the field of dietetics. The scholarship winner is chosen from among outstanding home economics graduates in colleges throughout Wisconsin.

On September 1, Miss Allman will begin a dietetics internship at the University of Colorado hospital in Denver, Colorado. Such internships are available to Stout dietetics majors, for the dietetics curriculum of the college meets the requirements of the American Dietetics association. Thus Stout dietetics graduates are admitted to internship training in all ADA approved hospitals in the United States.

Miss Allman, daughter of Mr. and Mrs. Elmore L. Allman, Phillips, has been active in extra-curricular activities at Stout, in addition to ranking fifth highest in her entire graduating class of 131 members.

She is a member of Phi Upsilon Omicron national honorary organization in home economics, president of Sigma Sigma Sigma sorority, and a member of the college home economics club. In the musical field, Miss Allman has been equally active. She has been a member of the Girls' Glee club at Stout and drum majorette of the college marching band. In addition, she has played the French horn with musical groups in this area.

While maintaining a high scholastic average at The Stout Institute, Miss Allman has also held summer positions in business and industry. For the past year, she has put her home economics training into practice in commercial food demonstration work.
